About This Game

TROUBLE ON PLANET LUCETIA!

The prince has been kidnapped. The royal guard, known as Renova, has gone missing. Aether has returned... As Magnetta, only you have the power to stop him!

Magnetta is a side-scrolling action game in the vein of classic NES titles. Jump, shoot, slide and blast your way through unique and challenging levels as you collect new weapons and upgrades, hunt down secret areas, and defeat your enemies to ensure peace in the galaxy.

You'll need to master every skill at your disposal if you're going to climb Aether's tower and take him out once and for all!

Fight your way through scrambled up levels in the Glitch, where the tilesets shift and change around you. Everything looks like you've got a dirty cartridge, and you'll need to know what you're doing to make it through and rescue your friends.

Time Trials:

The game keeps track of your fastest times on each level. You can return to levels you've already cleared and take them on again with new weapons and abilities, so find hidden shortcuts and master the best tricks for the fastest times. Magnetta also supports online leaderboards, so your friends can see how much better you are.

Speed Run Mode:

Once you've mastered the game and shaved down your level times, take what you've learned into Speedrun Mode. This mode clocks a continuous time for a full game playthrough. Don't mess up, there are no do-overs here.

Challenge Mode: Take on a range of themed challenges. Do you have what it takes to clear them all?

Unlockable Extras: Find collectible circuits throughout the game to unlock extra stuff like cosmetic changes or bonus abilities.

Cusomizable Controls: Play the way you want.

Filtering Options: Play in pixel perfect or add scanlines and anisotropic filtering to recreate the look of playing on a CRT

8 Unlockable Weapons: Destroy your enemies and traverse the levels in new ways

Bestiary: Find and destroy all enemy types to complete your bestiary. Check for other info like weaknesses, kill count, and little flavor text.

Authentic Soundtrack: These songs sound the part, and could play on actual NES hardware.

Title: Magnetta
Genre: Action, Indie
Developer:
Heliocentric Studios
Publisher:
Heliocentric Studios
Release Date: 31 Aug, 2016

Film kontrol. Good Game and very fun, but the IA are very strong XD.

Play with your Friend.

We are the first buyer with my friends !

Très bon jeux et fun, attention l'IA est très forte.

Jouer avec vos amis pour plus de fun.. Surprisingly fun and funny. 12/10 Peppa Pigs. Great and intense !

But at some point, the rate of arrivals becomes unrealistic. Hence the "go around" command to be activated more frequently than it should.

GG anyway.

Colib. can not connect to servers... cant even see what is all about. i dont expect it to be any good with a greeting like that. How to get Grey Wizard

1. Close TW:W.
2. Click the download link.
3. Play TW:W.
4. You should now see Grey Wizard has disappeared from DLC in the game's main menu.. I've only had this game for a short time, but I've already managed to rack up hours of gameplay. It's just so wonderful!!

The game itself is a turn based, tower defense game involving math(addition & subtraction), and magic. The design is splendid; the art, the music, and gameplay are all kid friendly. For instance, some of the built-in mechanics will even gently guide younger children to the answers if they become stuck.

There are a myriad of ways to clearing the monsters though. You can add spells together, and chain monsters together in various ways. You're also given potions with varying effects as you progress through the game, so there's a lot of creativity in how you beat each level. That creative freedom is what really gets me addicted. My favorite thing to do is take big risks, and let the monsters stack up a bit. Then unleash all the potions, and big spells in an attempt to get 'full clears'. :)

Story mode itself has numerous levels to progress through, and while you can revisit them at any time; there's also 'free play' mode with scaling difficulties. Oh, and each level is generated on the fly; so there's never any sequence to memorize. It's always going to be a new, and exciting challenge!

A simply charming game for all ages; I definitely recommend it!. A fascinating insight into the inner workings of a game development studio. You really see the ups and downs that come with creating a game and you even start to emphasise with the protagonists (i.e. the developers and designers).

Well-worth watching!. Only played for a tiny bit, but there were too many bugs and broken stuff. Couldn't put the game into windowed fullscreen or windowed mode, couldn't change resolution, and it would crash discord the whole time I was on it.

In my opinion, this is the only culture pack that is worth the buy. The Celtic factions are fun to play with especially with their guerilla deployment for every unit and completely unique unit roster. Unlike all the other culture packs, this one adds a decent amount of new content

7/10. Love is a hurting thing with platformer puzzles intermixed in between... CAVEAT EMPTOR!. The name Smokebox as developer triggers autopurchase mode with me. The man is an artist, n a class of his own. You want this. Absolutely one of my favorite locomotives. Highly recommended, without reservation.. An old fashioned point and click game with interesting plot twist.

The graphics are dated but this is not the most important aspect in this kind of game.

. I want to like this but I just can't.

It's a fantastic idea, and could potentially save people a long time on atleast setting up there tiles. But I'm not going to recommend this to anyone.

Firstly, why use this odd custom window/layout type graphic. I don't see it in any other Pixel related software and that's a good thing. It hasn't made it look any better than the normal windows do so why have it?

In the end it just makes it harder to use because nothing is familiar. It looks cheap, like the type of computer software that would come with a family camera. I take one look at it and become exhausted.

Secondly \$25 for an auto tiler? It's not even very good pixel art software in the first place, Most people would be better off making the art in Photoshop or GraphicsGale then exporting it to this because nobody is going to be making their art on it. Not to mention GraphicsGale is \$5 cheaper.

And lastly, I can imagine that once you're done with your tileset you will be exporting it back into your pixelart software because the tiles you end up will never be perfect. When you have some magic software doing all the work for you it will show, so you will most likely need to do some touchups in the end.

If you are serious about making games you won't use this, maybe for prototyping (if you can be bothered with the weird layout and graphics they have used) but you will always be better off making the art yourself by hand. and not for \$25.

"Tileset Maker version 2.0" is free and has a few features that will help you out with the tiling process.. i'm 15 and i still had to look up a guide for this game..

10/10. Not bad. This is the first time i've played a game in this genre since the 90s. Very fun and challenging game. I do have a few gripes with it though. You cannot use a keyboard and mouse. It does not have a higher resolution than 1200x900 which i've never even heard of. It does have a smooth framerate though which is to be expected at such low resolutions.

All in all \$5 is fairly decent for this trilogy and will give you a couple hours of fun and a good challenge!.. Very good HOG. Everything is fine in this game.

The game is not too difficult so that's a nice game to discover what HOG can be.

8/10.. why the ♥♥♥♥ cant i refund this game.....
